March 19, 2018

Thank you for your interest in our Phlebotomy program at Chesapeake College. Students who are admitted to the program are able to complete the coursework, clinical experience and sit for the national exam in just one semester.

To begin this process interested students need to complete and submit a program application which is available online at http://www.chesapeake.edu/allied-health/phlebotomy. A student that meets the admissions requirements will be notified in writing (preferably email) of their conditional acceptance and will receive an invitation to a mandatory information session. At the information session students will receive the necessary documentation and instructions for finalizing admission into the program. A criminal background check and health forms are among the requirements for full acceptance into the program.

This program has been approved for funding under the Workforce Innovation and Opportunity Act (WIOA). For more information, contact the Upper Shore Workforce Investment Board at: 410-822-1716. Funding approval takes at least two months so applicants must begin the process when notified of acceptance into the program. A representative from WIOA will be available at the mandatory information session.

If you require further information about the program please contact either myself or our Health Professions advisor, Lorraine Holden (contact information provided below). I hope Chesapeake College will be able to help you achieve your career and professional goals.

Regards,

Carol Wilson-Robbins
